

Chelmsford College Digital T-Level Showcase Activity

Project Title:

Chelmsford College Digital T-Level Showcase Website

Purpose:

A professional, interactive website to present Digital T Level student projects, learning resources, and contact information to visitors during the College Showcase Evening.

Target Audience:

Prospective students, parents, college staff, and industry partners visiting the Showcase Evening.

Learning Objectives for Students:

- Implement multi-page websites with navigation
- Apply CSS templates for consistent design and responsive layout
- Use JavaScript for interactive features (quiz, project filtering, theme toggling, or image sliders)
- Showcase real student projects with images, descriptions, and links
- Collect visitor interest/contact info with forms

Website Structure:

Folder Layout:

showcase_website/

index.html	(Home / Welcome Page)
projects.html	(Student Projects Showcase)
contact.html	(Contact / RSVP Form)
styles.css	(Shared CSS)
script.js	(Shared JS)
images/	(Placeholder images)

Page 1 - Home Page (index.html):

- Welcome banner with title and college branding
- Brief description of the T Level Digital Production & Design course
- Navigation links to Projects and Contact pages
- Optional theme toggle button (light/dark mode)
- Slideshow of featured project images

Page 2 - Projects Page (projects.html):

- Grid or card layout of student projects
- Project details: title, description, category, image
- Filter buttons: "All | Web | Design | Multimedia"
- Hover animations and JS interactivity

Page 3 - Contact Page (contact.html):

Chelmsford College Digital T-Level Showcase Activity

- RSVP form: name, email, visitor type, optional message
- College contact info
- Optional embedded map
- Form validation with JavaScript and confirmation message

Additional Features:

- Responsive layout for tablets and mobiles
- Consistent blue/white theme
- Navigation bar visible on all pages
- Placeholder images for student projects
- Accessibility features (alt text, semantic HTML)

Educational Focus:

Students will:

- Apply HTML, CSS, and JS skills in a professional context
- Practice multi-page navigation and site structure
- Understand user experience for a real showcase
- Present digital work interactively
- Produce a professional-ready portfolio project
